

CLASS 5 ALL-ELECTRIC CREW CAB

Power up and get it done. Engineered from the ground up to handle the payloads and go the distance real work requires, the Blue Arc™ Class 5 All-Electric Crew Cab is in a class by itself. This complete, road-ready work truck combines a Class 5 EV chassis with a lightweight aluminum truck body and a game-changing crew cab design — purpose-built for construction, trades, municipalities, snow removal, landscaping, and other hard-working vocations. Backed by 50 years of Work-Driven Design™, breakthroughs in driver safety and workspace, and the latest EV technology, it's time to charge ahead as never before.

Empower drivers and crew

The game-changing Blue Arc™ Class 5 All-Electric Crew Cab is designed to make work safer, more comfortable, and more productive for the whole team.

SPACIOUS INTERIOR

88.5" wide, 85" high cab design creates a generous interior space, with plenty of headroom and legroom to sit, stand, and move ergonomically on the job. Multiple cab layouts accommodate up to a full crew.

SAFE, CURBSIDE ENTRY

Industry-first slider door provides safe, easy entry and exit from curbside, eliminating risk of opening doors into traffic.

WEATHER-PROTECTED STEPS

Fully enclosed steps are clean and low, protected from weather and grease to reduce risk of fall and injury.

OFFICE ON THE ROAD

Pull-down worksurfaces and monitor support modern work as teams field calls, use laptops and handheld devices, and collaborate around information on the digital display.

AMPLE SEATING

Cushioned seating creates comfort for all. A driver-side jump seat accommodates one more at a moment's notice.

Plugged into the work you do

COMMERCIAL-GRADE FEATURES

- Proprietary, purpose-built, all-electric chassis
- Commercial-grade e-axle
- 6-year or 180,000-mile battery warranty
- 75 mph top speed
- 200-plus mile range
- 6,000–10,000 lb payload capacity
- 88.5" wide, 85" high cab design
- Lightweight aluminum and composite cab

EV CAPABILITIES

- Modular, liquid-cooled lithium-ion battery packs with 158–316 kWh
- Level 2 and DC fast charging of 800-volt system
- Commercial-grade 4,000-cycle cells
- 450Wh solar option
- 2- to 6-hour accelerated charge time
- Battery upgrade and buyback programs

DRIVER COMFORT FEATURES

- Ergonomic, spacious cab
- Slider-door curbside standing egress
- Enclosed, weather-protected steps
- Cushioned seating plus flip-up jump seat
- Drop-down computer monitor
- Drop-down table
- Automotive-grade dash
- Keyless entry and start

DRIVER SAFETY FEATURES

- 360° camera with 12" HD display
- Front camera AeroCap integration
- Front parking sensors
- Blindspot detection
- Tire pressure monitor

NATIONWIDE SERVICE AND OEM SUPPORT

- Real-time status updates
- VMRS codes
- Factory-trained EV technicians
- In-stock EV parts
- Distribution centers across the U.S. and Canada
- Dedicated product support team
