

Rig Tough Radiator Caps

Features and Benefits

- Rugged design, requiring no adjustments
- All parts in contact with the engine coolant are made of non-corrosive material such as stainless steel or commercial quality brass
- Special gasket compounds to withstand high temperatures and all standard antifreeze/coolant solutions
- Free to rotate function allows independent movement of neck and valve gaskets to prevent damage during installation and removal
- Two extra-long ears at the side allow cap to be easily held during installation and removal
- All caps are 100% leak tested and made to OEM Specifications
